POWERkits-dL

POWERkits-dL are stand alone complete Virtual Instruments that you can download from this website and start using immediately!

No sampler is required!

These individual and complete drum kits are fully rendered versions of our incredible sounding drum kits from our Larry Seyer Acoustic Drums collection.

They sound identical to them in every way and are fantastic for playing 'live' and for studio recording situations where your computer's horsepower is not quite up to the task of playing our other libraries.

These are complete stand alone plugins! GigaStudio or GVI are NOT required!

Easy to Use!

The menu system is fast, clean, and easy to use with the following presets immediately accessible:

- DAW EX Layout
- DAW GM Layout
- StandAlone EX Layout
- StandAlone GM Layout

Start Start with any drum kit that you want... it doesn't matter. And then additional drum kits later!

Each time an additional drum kit is purchased and installed, you have access to more great sounding drum kits. In other words, you purchase one drum kit now and each addition drum kit purchase increases the number of drum kits available to you in the plugin's drop down menu.

All of your drums will be neatly organized and conveniently located within one simple and easy to use plugin.

POWERkits-DL (Download) is a Virtual Instrument that operates in both stand alone mode (i.e. it does not require GigaStudio or GVI to work), AND it operates as a VST, RTAS, (and soon AU) plugin inside of your DAW (such as Pro Tools, Nuendo, Cubase, Sonar and soon Logic).

The drum kits sound identical to our Larry Seyer Acoustic Drums library in every way. And for ease of mixing, individual outputs are provided for each drum component group for separate treatment in your DAW or live house mixer.

Since the 24bit stereo samples are pre-rendered with room and mic colors, each drum component is routed to it's own complete self contained stereo output channel in your DAW!

And since we've spent months mixing and balancing the each drum kit for you, mixing is super easy, AND you have the option to change the mix! So you get the best of both worlds.

### Incredible Features!

- Over 750 MB of 24 bit stereo drum samples
- 1 complete drum kit with included stand alone plugin
- Extremely low computer requirements
- VST and RTAS compatible Virtual Instruments
- Stand-Alone or Host mode
- Thousands of individual drum samples
- Optimal/EXpanded (EX) and General MIDI (GM) keyboard layouts
- Recorded with premium mics and vintage gear
- Stick, rod, mallet & other striker variations
- Loop library with 1000's of MIDI files (download after registering \* )
- Unique 'Dry Cleaner' color embedded into all samples for warm and punchy drum sounds
- Comprehensive illustrated color manual
- Multiple unique 'Zones' for snare drums and toms
- Features GVI 'stacked' instruments for ease of mixing and building custom kits
- Expandable... Buy one Volume now - add more Volumes later
